ICMPD Job Profile
BUSINESS ECOSYSTEM LEAD [1] - ENHANCER

Functional Overview

The Business Ecosystem Lead is responsible for the planning and implementation of activities within Enhancer Project components and for the provision of specialised substantive expertise focusing on ecosystem management within the project. S/he develops and maintains relationships with partners, beneficiaries and other stakeholders and plans, organises and supervises the work of consultants and contractors ensuring high quality and timeliness of outputs. S/he conceptualises, plans and prepares substantive project outputs and produces project content and prepares donor and other substantive project reports, continuously assessing achieved results for quality and impact. S/he works closely with the Portfolio Manager and in close collaboration with other members of the project team as well as with other relevant Units in ICMPD. S/he contributes to the formulation, management, and evaluation of the ENHANCER project according to the approved project documentation, work plans and budgets, and in line with ICMPD´s rules and business processes as well as partner and donor agreements. S/he provides technical input to new project concepts based on a review of project results and recording of best practices and lessons learned.

Key Results

Planning and Implementation of Activities: All activities effectively planned and implemented according to the project´s work plan ensuring the timely accomplishment of project outputs. Any required corrective action promptly initiated and implemented. Activities with project stakeholders and partners effectively coordinated, ensuring they are carried out according to the agreed work plan and other agreements. Project partners actively guided on project implementation with the work of project staff, experts, consultants, and contractors being expertly planned and coordinated to ensure that content and outputs are produced timely, according to project work plan and ICMPD´s quality standards. The design and formulation of content and scope for meetings, workshops and other activities ably implemented, identifying relevant participants and resource persons.

Monitoring of Progress and Compliance: The progress of project activities proactively monitored through regular reviews and assessments and missions, as required. Compliance with ICMPD's policies and procedures within the area of responsibility closely monitored ensuring that administrative processes for mobilisation and management of consultants and for procurement are carried out promptly and in accordance with ICMPD rules and established business processes, and in compliance with donor rules as applicable. Expenditures and disbursements systematically reviewed, ensuring that budget allocations are not exceeded, and that effective corrective action is implemented as required.

Substantive Contribution and Provision of Technical Expertise: The coordination of the respective competitive selection process of the grantees expertly implemented with the relevant
